AUTHOR INDEX VOLUME 7 (1988)

The issue number is given in front of the page numbers

Akgül, M., A sequential dual simplex algorithm for the linear assignment problem (3) 155–158
Anger, F.D., *see* C.-Y. Lee (3) 141–147
Balas, E., On the convex hull of the union of certain polyhedra (6) 279–283
Birge, J.R. and K.D. Glazebrook, Assessing the effects of machine breakdowns in stochastic scheduling (6) 267–271
Böttcher, A., G. Lawitzky and H.-U. Simon, Worst-case analysis of heuristics for the local microcode optimization problem (3) 127–130
Chand, S., Decision/forecast horizon results for a single faculty dynamic location/relocation problem (5) 247–251
Chang, C., An absorbing set for cooperative games (3) 149–153
Chiang, D., *see* J. Flynn (4) 167–172
Chow, Y.-C., *see* C.-Y. Lee (3) 141–147
Chung, C.-S., *see* J. Flynn (4) 167–172
Conway, A.E., Insensitivity in models of flexible manufacturing systems with zero-buffer stations and reversible routing (4) 163–166
Dijk, N.M. van, On Jackson's product form with 'jump-over' blocking (5) 233–235
Dijk, N.M. van, Finite source blocking systems with multilevel active and idle period (6) 315–320
Djerdjour, M., K. Mathur and H. Salkin, A surrogate relaxation based algorithm for a general quadratic multi-dimensional knapsack problem (5) 253–258
Doorn, E.A. van, and G.J.K. Regterschot, Conditional PASTA (5) 229–232
Filar, J.A. and T.A. Schultz, Communicating MDPs: Equivalence and LP properties (6) 303–307
Fischetti, M. and P. Toth, A new dominance procedure for combinatorial optimization problems (4) 181–187
Fisher, D.C., Next-fit packs a list and its reverse into the same number of bins (6) 291–293
Flynn, J., C.-S. Chung and D. Chiang, Optimal replacement policies for multicomponent reliability system (4) 167–172
Freund, R.M., An analog of Karmarkar's algorithm for inequality constrained linear programs, with a 'new' class of projective transformations for centering a polytope (1) 9– 13
Gafni, A., *see* A. Mehrez (3) 131–139
Glasserman, P., Infinitesimal perturbation analysis of a birth and death process (1) 43– 49
Glassey, C.R. and M.G.C. Resende, A scheduling rule for job release in semiconductor fabrication (5) 213–217
Glazebrook, K.D., *see* J.R. Birge (6) 267–271
Gottlieb, E.S. and M.R. Rao, Facets of the knapsack polytope derived from disjoint and overlapping index configurations (2) 95–100
Gupta, S.K. and A.P. Punnen, Minimum deviation problems (4) 201–204
Harker, P.T. and J.-S. Pang, Existence of optimal solutions to mathematical programs with equilibrium constraints (2) 61– 64
Hartvigsen, D.B. and D.K. Wagner, Recognizing max-flow min-cut path matrices (1) 37– 42
Ho, J.K. and W.A. McKenney, Triangularity of the basis in linear programs for material requirements planning (6) 273–278
Hooker, J.N., Resolution vs. cutting plane solution of inference problems: Some computational experience (1) 1– 7
Horst, R., J. de Vries and N.V. Thoai, On finding new vertices and redundant constraints in cutting plane algorithms for global optimization (2) 85– 90
Hwang, J.-J., *see* C.-Y. Lee, (3) 141–147
Jain, S. and J.G.C. Templeton, Statistical inference for G/M/l queueing system (6) 309–313
Jones, P.C., *see* E.S. Theise (5) 241–245
Keilson, J. and A. Seidmann, M/G/∞ with batch arrivals (5) 219–222
Keilson, J. and L.D. Servi, A distributional form of Little's law (5) 223–227
